Lip Repositioning - Advances in Oral Plastic Surgery, Advanced Hands-On Surgical Course

With Dr. Monish Bhola

February 18, 2012

Toronto, ON

Course Overview

This course is designed to acquaint the dentist with advances in periodontal plastic surgery, hard tissue grafting, recent evidence, new techniques and advanced biomaterials.

The new and innovative Lip Repositioning Procedure to correct a high smile line, short and hyper mobile lip will be presented and discussed in detail.

Additionally, soft tissue grafting including the coronally advanced flaps, soft tissue grafting techniques utilizing DynaMatrix Plus will be presented.

Description of procedures utilizing clinical slides and videos will be followed by hands-on practice on pig jaws.

Surgical instruments and disposable gowns will be provided for use during the course. Participants should bring protective eyewear and wear comfortable clothing.

Course Objectives:

- *Learn to evaluate and treatment plan patients with gummy smiles*
- *Learn and perform the lip repositioning technique to correct vertical maxillary excess*
- *Discuss the importance of different incision techniques- microsurgical vs. macrosurgical*
- *Learn more about how soft tissue biotype affects treatment planning for implants*
- *Learn about recent evidence, new techniques and biomaterials as alternatives to palatal grafts*

The new and innovative Lip Repositioning Procedure
