

## LECTURE OBJECTIVES

- Extract simple or broken down teeth usually without opening a flap
- Prevent or manage maxillary sinus problems
- Avoid tuberosity fractures
- Lay the foundation for implants by rebuilding the extraction sites with bone grafting materials
- Select bone grafting materials that are most appropriate to future treatment
- Have necessary consent forms for the extractions and bone grafts

## COURSE FORMAT

### Morning:

- Lecture
- Hands on atraumatic bone extractions, bone grafting, suturing and single tooth implant placement on pig jaws

### Afternoon:

- Live surgery (atraumatic extractions and bone grafting) by attendees on their patients

Preop radiograph

Extent of destruction of buccal plate.

Excellent ridge for implant placement after bone grafting

## EXTRACTION & BONE GRAFTING

This is a practical, fast paced course that will enable you to extract teeth fast and allow you to apply evidence based dentistry to your real world Monday. This is hands on course that will feature extraction on pig jaws followed by live surgery on patients.

The key to a successful general dental practice is the ability to do procedures effectively in a repeatable manner. Oral surgery, particularly extraction of teeth can be viewed as being unpredictable, stressful and counterintuitive to a productive schedule. Further the extraction of teeth as we were taught in dental school with the routine opening of flaps and removal of buccal bone is destructive, and time consuming.

The science of atraumatic extractions simply enables the general dentist to predictably extract teeth in an efficient manner that is both productive to the practitioner and beneficial to the patient. With the use of key instruments and a sound biological base, the flapless removal of simple and broken down, compromised teeth will be taught resulting in a more efficient and productive day. Bone grafting after extraction of any teeth is a very necessary and simple treatment. Different types of bone grafting materials, membranes, suture techniques will be taught.

Presented by Dr. Dilshad Hirji

**DILSHAD HIRJI, B.SC., D.M.D.**

Dr. Hirji started her private practice in her first year after receiving her doctorate from Tufts University, School of Dental Medicine. In 2006, she established Dental Solutions, a unique, 5400 sq foot state-of-the-art, and custom designed facility to showcase her commitment to excellence in dentistry. She is a general dentist and provides a range of dental services from orthopaedics, orthodontics, periodontal and implant surgery, esthetic rehabilitative to pure bread and butter dentistry.

She is passionate about dentistry and believes that a successful general practice is a result of great leadership skills and smart practice management systems. She is ever strategizing on how to work smarter, not harder to generate a high case acceptance. She also believes that an ethical, rewarding and profitable practice should be the goal of every dentist. She brings a unique and positive perspective of incorporating clinical skills to the general practice environment.

She recently started the Leadership in Dentistry Training Institute in 2008. Dr. Hirji uses her sixteen years of clinical experience combined with her operational systems to provide participants with practical and useful information that can immediately make a positive impact on the performance of the dentist for patient care and the betterment of their own business model. Her no nonsense approach is refreshing and her seminars are uniquely practical, hands-on and results orientated; statistically, five out of six participants successfully incorporate the new

skills learnt at her seminars into their daily practice.

Dr. Hirji has been fortunate to be invited to speak at the upcoming Townie Meeting (Dentaltown) in Las Vegas. She also was invited to present a Soft Tissue Grafting course for general practitioners in New York in November 2008. She has lectured for Astratech and conducted hands on implant courses for Tenax Implant. She has also presented at the FDI. She continues to follow an extensive program of continuing dental education to broaden her skill set.

**COURSE DETAILS**

<b>DATE</b>	Friday May 29 <sup>th</sup> , 2009
<b>TYPE</b>	Full day seminar
<b>CREDITS</b>	6 points
<b>TUITION</b>	<b>Morning lecture: \$350</b> <b>Full day (with live surgery): \$995</b> <i>Participants must bring their own patients</i>
<b>TIME</b>	8:30 A.M. – 5:00 P.M.
<b>LOCATION</b>	2 Automatic Road, #114 Brampton, ON L6S 6K8

**CONTINENTAL BREAKFAST WILL BE SERVED AT 8:00 A.M.**

**COURSE WILL COMMENCE AT 8:30**
